

### 3 Tournament Rolling Ranking System

At the conclusion of each tournament, players will receive points based on how well they did during the tournament.

THE POINT VALUES ARE GENERALLY AS FOLLOWS:

1ST PLACE - 64 POINTS

2ND PLACE - 32 POINTS

3RD PLACE - 16 POINTS

4TH PLACE - 8 POINTS

Point Values may change if a 16 man draw is used. All points are printed on the draw sheets.

Player Rankings must be updated after each tournament and used for seeding the next tournament.

Rankings will be based on a 3 tournament rolling point system. Only points from the 3 most recent tournaments will be counted. This rule allows new comers a chance to break into the scene and old points to be eliminated. This new rule will encourage all players to attend tournaments regardless of how well or how bad they have done in the past. It is important to keep track of individual points for every tournament.

Remember, only the points from the 3 most recent tournament will be counted. This mean that old points must be subtracted before new points can be added. You can look at SVGL's Rankings for an example. ( Notice the dates above the points. The dates correspond to the tournament )

For every tournament the current 1st, 2nd, 3rd, and 4th ranked players will be seeded in the tournament. The earliest these players can meet will be in the Semi's. This ensures even brackets and no stacked sides of the draw. Every player will benefit from this.

Everyone else will be place randomly throughout the draw sheet.
